

Brief of Client's Needs — Kaptrain

1. Client Identity

Company: Kaptrain

Contact persons:

- Enguerrand Aucher (President)
- Tristan Aucher (General director)

Industry:

Sports performance, coaching, athlete monitoring, stats & training optimization.

2. Client Problems / Pain Points

- Kaptrain currently manages athlete performance, training schedules, testing sessions, and follow-up **manually**, across multiple tools or formats.
 - There is **no unified platform** for coaches and athletes, which creates friction, loss of data, and inconsistent follow-up.
 - Coaches don't have a **centralized, real-time dashboard** to track progression, collect metrics, or adjust programs.
 - Athletes lack a **simple interface** to receive instructions, report data, and follow their individualized training plan.
 - The current process doesn't scale: the more athletes they onboard, the more operational chaos grows.
 - Kaptrain wants a **serious, professional, well-designed application** that aligns with the level of service they want to deliver.
-

3. Client Goals

Business Goals

- Deliver a premium digital experience to athletes & coaches.
- Increase retention and satisfaction of both athletes and coaching teams.
- Reduce manual work and operational overhead.
- Scale operations without increasing workload (automation).
- Offer a product that reflects a **serious, professional sports coaching brand**.

Product Goals

- Centralize all coaching–athlete interactions.
 - Provide clear training plans, tests, data tracking, and results visualization.
 - Allow coaches to follow multiple athletes with ease.
 - Make the app intuitive for athletes, engaging but not “gadget”.
-

4. Expected High-Level Solution (Client Version)

The client expects:

- A **mobile application** for athletes to receive their program, log data, and follow progress.
- A **back-office web platform** for coaches to manage athletes, design training plans, assign tests, and track metrics.
- A clean, simple interface—not overloaded—focused on **performance and progression**.
- A system that supports **tests** (physical evaluations), **training plans**, **progress tracking**, and **communication** (notes/updates).

No technical expectations were expressed.

The client describes the solution as:

“An app for athletes + a control dashboard for coaches.”

5. Target Users (Client View)

1. Athletes

- Receive training plans
- Log test results
- Follow their progression
- Receive updates from the coach

2. Coaches

- Manage training plans
- Monitor athletes
- View test results
- Adjust programs based on data

3. Kaptrain Admin

- Oversee the entire system
 - Manage coaches and athletes
 - Ensure data consistency and quality
-

6. Urgency & Timeline Expectation

Start: As soon as possible after contract signature (project kickoff planned early December).

Desired go-live: March 2026, aligned with the delivery timeline inside the contract.

Reason for urgency:

- Business need to structure their coaching offer
- Desire to launch for an upcoming season / performance cycle
- Kaptrain is currently limited by manual processes
